

## PROVIDES BEHIND-THE-FENCE LNG AND CNG FUELING STATIONS FOR HTA FLEETS

By Scott Johns, President, CLEANCOR LNG LLC

The only thing that is consistent these days is change and our ability to quickly adapt to these changes in the market is what sets a successful operation apart from the competition.

CLEANCOR LNG LLC (CLEANCOR) provides behind-the-fence or private LNG and CNG fueling stations to fleets with alternative fueled vehicles across the nation. It is no secret that most major blue-chip companies have private fueling stations for their fleets as they are very aware fueling from public stations adds a significant amount of time to their daily operations.

CLEANCOR recently installed another mobile behind-the-fence LNG fueling station for a customer who was sending drivers to a public LNG station more than 10 miles out of the way from their normal route. This 10-mile drive was adding more than thirty minutes per truck every day and was causing a major bottleneck in their otherwise very efficient operation.

A full brick and mortar fueling station is typically excessive and costly, making private fueling stations out of reach for most companies. CLEANCOR has several types of mobile/temporary LNG and CNG fueling solutions for all sizes of fleets without the costly expense of a full permanent station. We understand that most of our customers lease their property, which adds to the complication of building a private station.

CLEANCOR provides a mobile fueling solution that allows our customers of all sizes to achieve all the benefits of a private station without the expense of a permanent station. With our flexible and mobile LNG and CNG fueling stations CLEANCOR is able to customize a fueling solution specific to your company's needs.

A CLEANCOR behind-the-fence LNG or CNG fueling station can be deployed in a matter of days with little to no disruption to your current operations. In today's competitive environment it is more important than ever to adapt to changes and increase efficiency across your operation.

CLEANCOR is a member of the Harbor Trucking Association. For more information on our Behind-the-Fence LNG and CNG fueling stations please contact Scott Johns at (949)294-9435 or [SJohns@CleancorEnergy.com](mailto:SJohns@CleancorEnergy.com)
